TO: Minerals File
FROM: Doug Jensen, Reclamation Specialist *DJensen*
RE: Site Inspection, D. Leon Hall, Hard Rock #1 Mine, S/053/054, Washington County, Utah

Date of Inspection: April 15, 1999
Time of Inspection: 1130
Conditions: Warm and Clear
Participants: Doug Jensen and Lynn Kunzler, DOGM

Purpose of Inspection: No fees paid on the site this year

Site has been poorly recontoured. The site contains several small excavation sites where the material has been partially pulled back into the pit areas. The areas are rough and there is some evidence of reseeding, in the form of a good growth of penstemon. There is no evidence of any of the other plants recommended in the reclamation seed mix.

In view of the regrowth in the area any effort to upgrade the existing reclamation will not result in upgrading the site. Recommend closing the file. Photos were taken to document site conditions.
